

BT.CX Java backend developer

Do you like crypto? **bt.cx** is one of the biggest Bitcoin exchanges in Sweden and we are looking for a Java backend developer to join us on the exciting Bitcoin journey. Our main office is in Stockholm and we are in process of bootstrapping our team in Belgrade.

What you will be working on:

- designing and implementing new api for our cryptocurrency trading site
- building services to handle and support crypto transactions
- integrating new payment systems
- making sure that backend is 100% secure & safe

What we expect from you:

- experience with building microservices in Java and Spring
- you are fine with other programming languages like Python, Go
- you've designed, built and maintained production services
- you talk Web and love spending time in Linux shell
- experience in securing services
- degree in computer science or equivalent

Why bt.cx?

- competitive salary
- relaxing work environment
- work from the office or remotely
- chance to shape the future of crypto market

Send us link to your Github or LinkedIn profile, anything awesome you've built that you're proud of, or simply your resume.
